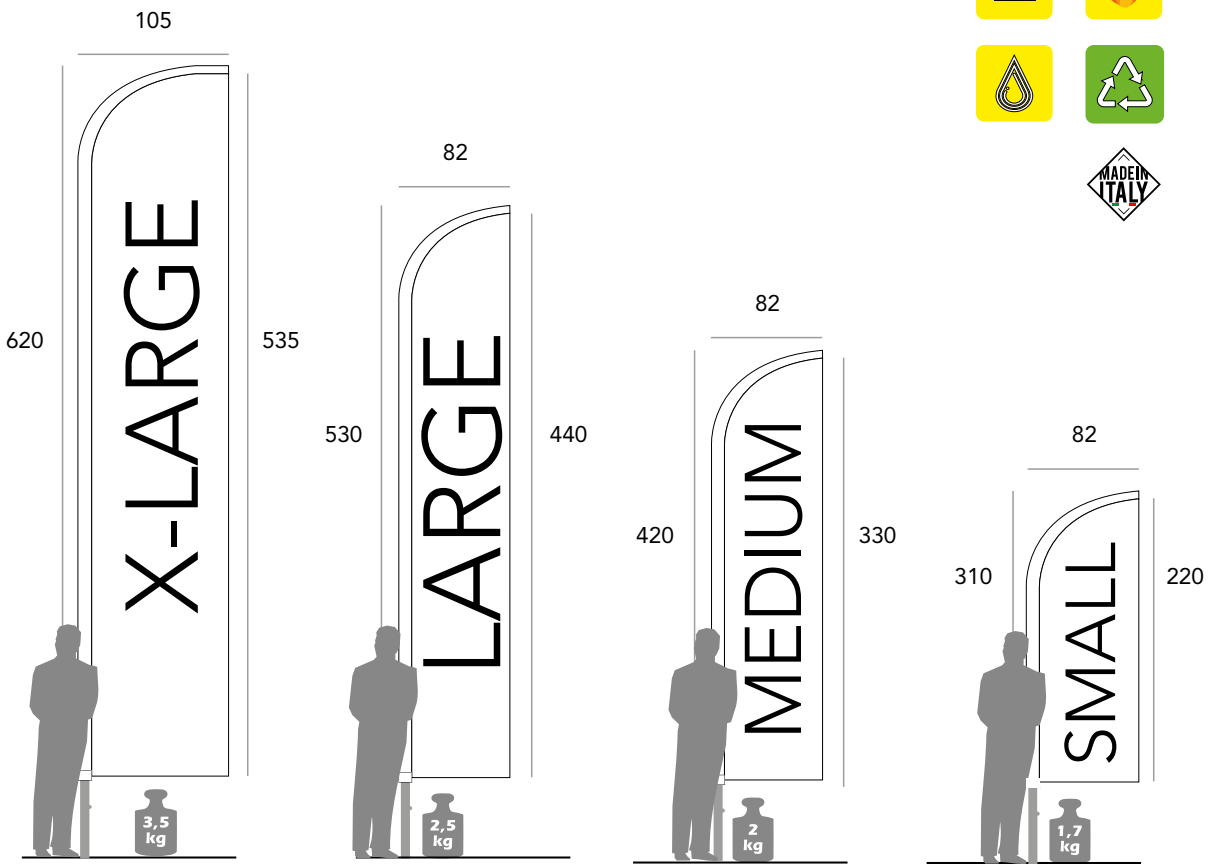
  - DROP
  - SQUARE
  - MINI
  - TABLE
  - BASE PLATES AND ACCESSORIES
- MARKING FLAG
- CAR FLAG
- SUPPORTER FLAG
- PENNANT FLAG STRINGS
- **BACKSTROKE FLAGS**

Easy-Flag | CLASSIC

Available in four sizes in the classic "knife" shape, they can be mounted and dismounted very quickly. The flag kit, enclosed in a strong polyester bag with zip, includes the screw ideal to fix the flag in soft ground such as grass, snow, sand and soil. Various metal bases are available, studied for different uses and fit for solid surfaces as concrete and asphalt. You can also order just the flag.

- Large and small quantities
- Anodized aluminium structure
- Spring steel flexible tip

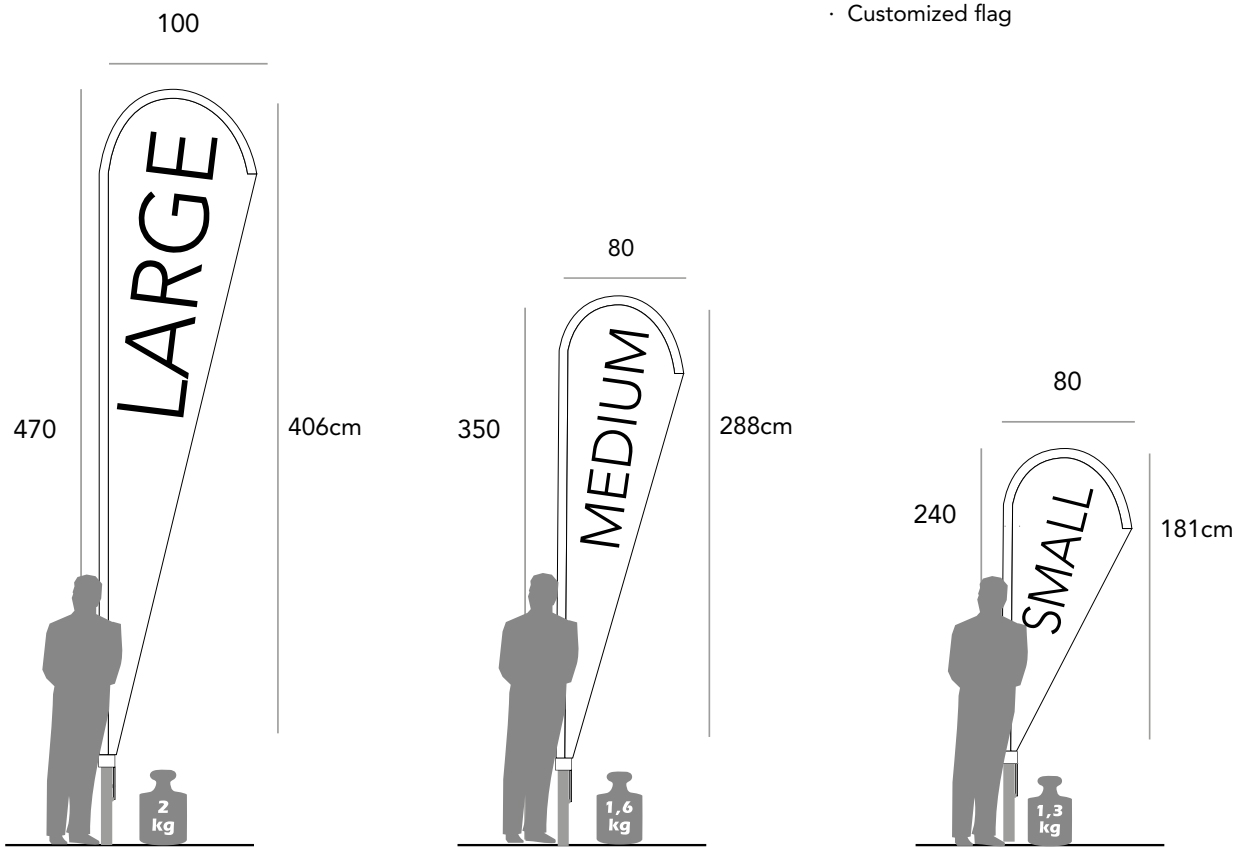
- Quick and easy to assemble
- Packaging designed for easy storage
- Customized flag



Easy-Flag | DROP

The Easy-Flag Drop is a flag with the same features of the classic one but with a "drop shaped" flag, 100% made of polyester. Its complete kit is delivered in a strong polyester bag with a zip including the screw to fix it on soft grounds, advertising flag, anodized aluminium poles and flexible spring steel tip. Thanks to its structure it stays perfectly tight even with no wind. You can also order just the flag.

- Easy and quick to assemble
- Customized flag



Easy-Flag | SQUARE

The Easy-Flag Square is a promotional flag with a squared design that retains the same sturdy structure as the Classic version, offering a more contemporary look.
Made from 100% polyester, it is supplied as a complete kit in a practical and durable polyester zippered carry bag. The set includes: ground screw anchor for soft soil, printed flag and anodized aluminum poles.
Thanks to its rectangular structure, the sail remains perfectly tensioned even in the absence of wind, ensuring maximum visibility and a consistently strong visual impact

- Easy and quick to assemble
- Easy to transport
- Lightweight
- Customized flag
- Digital printing

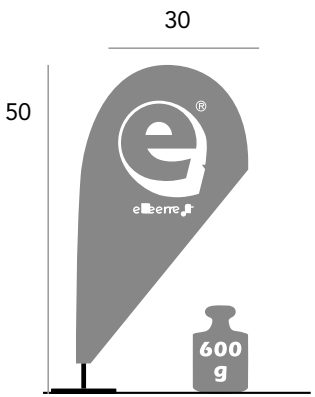
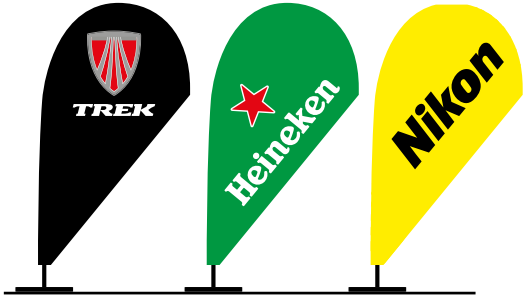
SPEAKING BOX

Easy-Flag | TABLE

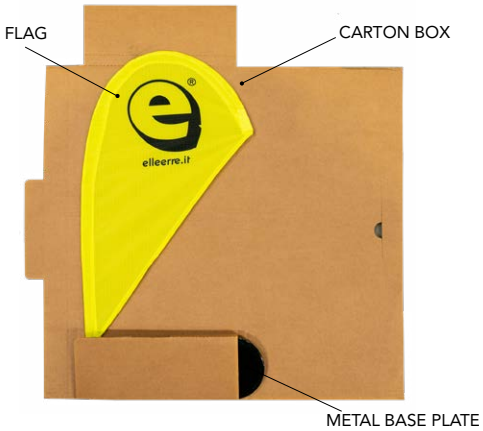
Easy-Flag Table is the table flag which gives visibility to your brand in an elegant and unusual way. Ideal for shops and fairs. Fully customizable and without colours limits. Flag made of polyester. Available in a one-box complete kit with polished metal base, fiberglass pole.

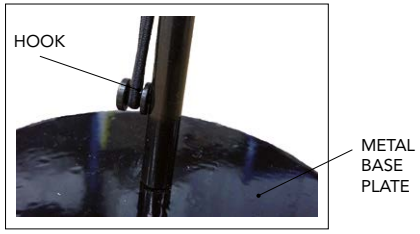




Easy-Flag Table Full Kit

Easy-Flag Table full kit includes





MARKING FLAG

Marking flags are an indispensable tool for every outdoor event. Delimiting several areas of the race and marking the path is paramount for the safety. For this reason ElleErre has designed and realized this versatile marking flagship, easy to position and fully customizable.

- Standard size 25 x 33 cm
- Wood pole

HIGH-VISIBILITY FLAGS

The high-visibility marking flags are essential for night events and competitions. Marking the route when it is dark is a matter of safety. For this reason ElleErre has realized this versatile, fully customizable, easy-to-install flag, with an high-visibility section.

- Digital printing
- High-visibility section

- Nautical polyester fabric
- Beech wood striped

- Standard size 25 x 33 cm
- Customizable dimensions

CAR FLAG

ElleErre car flags are designed to be fitted directly out of the window, drawing the attention and curiosity of those who see them. Car flags are the best way to promote your brand during car track events.

Plastic car holder

- Digital printing
- Nautical polyester fabric
- Plastic car holder
- Standard size 25 x 33 cm

SUPPORTERS' FLAG

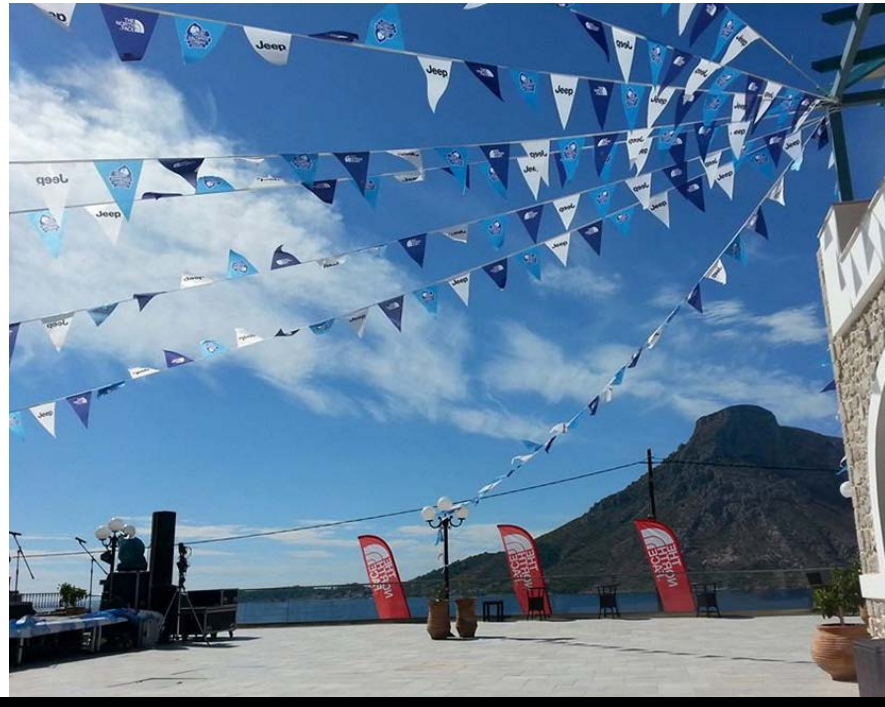
The supporters' flags during sport events are an exceptional tool for visibility. Flags for fans and supporters are designed to root for relatives and friends. Swinging at the passage of athletes or on arrival is always fun for adults and children. Made with European flag-making high grade nautical polyester, a 100% recyclable material, which ensures excellent printing quality and durability over time.

- Digital printing
- Nautical polyester fabric
- Wooden pole
- Standard size 20 x 30 cm

PENNANT FLAG STRINGS

A string of pennants is an effective and colorful promotional solution, ideal for decorating and enhancing a wide range of events and occasions, such as festivals, openings, promotional campaigns, and commercial initiatives.
Available in both rectangular and triangular formats, they are made from 100% nautical polyester fabric, designed to ensure high resistance and long-lasting durability even in outdoor environments.
The flags are sewn onto webbing or rope to allow quick and easy installation on the desired structures, ensuring maximum visibility.
Thanks to high-resolution digital printing, the pennant flags can be fully customized with logos and graphics without color limitations.

- Custom Printing
- Available in various lengths and dimensions



BACKSTROKE FLAGS

Backstroke flags are an essential feature for all swimming pools hosting competitions, events, or lane swimming activities.
The flags feature high-quality custom printing and are sewn onto durable webbing to ensure stability and easy installation across the pool.
Available in various lengths and sizes, they adapt perfectly to different requirements. The customization option allows the inclusion of logos, corporate colors, and dedicated graphic elements.
The flags are printed on special 240-micron paper, selected for its high resistance to water and chlorine exposure. The material delivers vibrant colors and long-term durability.

- Chlorine and water resistant
- Custom Printing
- Available in various lengths and dimensions

Easy-Gazebo

- Easy-Gazebo LIGHT
- Easy-Gazebo PRO

Easy-Gazebo

Easy-Gazebo PRO has an aluminium structure, while the roof and sidewalls are digital printed and fully customizable. The Class 1-certified fabric is waterproof and fireproof, making all ElleErre gazebos suitable also for indoor use.

The roof, the pelmets and the sidewalls are available in a range of neutral colours, without customization (Mod. STANDARD), while the version Roof Easy-Gazebo can be fully customized with no limits for colours or graphics. It is also possible to print high definition pictures on the sidewalls and the roof , with no additional costs.

In the measures 3x3 m e 3x4,5 m, the frame Easy-Gazebo Light is also available with hexagonal aluminium structure poles, which are lighter and cheaper. Both the PRO and LIGHT structures can be folded and opened in a few seconds, allowing a quick installation.

These gazebos are delivered with rods, anchoring pegs and wheeled carry-on case for an easy transport. Spare parts and accessories are available, such as extra metal ballasts, sidewalls with doors and windows which can be produced upon customer request.

BANNERS

- TNT DIGITAL PRINTING
- TNT SERIGRAPHIC PRINTING
- MESH BANNERS

TNT BANNERS

Practical, efficient and economical, the TNT nonstop unit banners are ideal to be employed at sporting events and on any other occasion. They can be delivered in rolls or in single units with or without PVC reinforced installation eyelets. The digital printing is employed for small quantities and complex graphics, while for big quantities we prefer the serigraphy, achieving the best value for money.

- Digital or serigrahic printing
- ndless possibilities of use outdoors and indoors
- Lightweight
- cost transportation

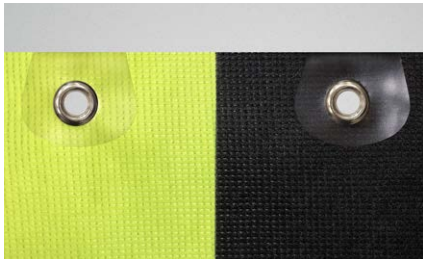
- Finishing possibilities:
  - roll
  - roll with eyelets
  - single banners with eyelets

- Easy to hook the banners to the structures (poles, gates, barriers…)
- Available in the standard size (height 80 o 100 cm) or customizable size (up to 160 cm and beyond) according to the customer's needs

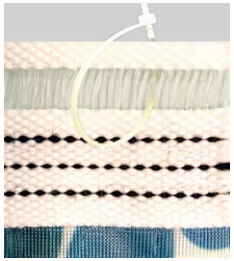
- The quality of printing allows to print both simple logos and high definition photographs

Accesories

EYELETS WITHOUT REINFORCEMENT



EYELETS WITH REINFORCEMENT



MULTI-COLORED BAND

TNT BANNERS/DIGITAL PRINTING

Digital printing is to be used for graphics with a wide range of colours and shades and it should be preferred for smaller quantities. The result is a high definition printing with bright colours, uniform shades and sharp details.

- Best quality for complex pictures and drawings
- Possibility to duplicate any graphics with no colour limit
- Suitable for the production of small quantities
- Printing without loom

HEIGHT
h.80cm - Standard
h.100cm - Oversize

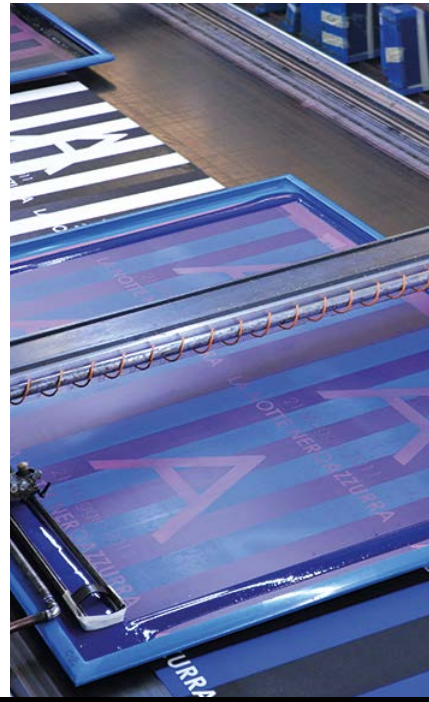
Digital printing.

TNT BANNERS/ SERIGRAPHIC PRINTING

The serigraphic printing is to be preferred for larger quantities, it is suitable for printing plain colour graphics, with clearly defined outlines and colours.
To obtain a serigraphic print a printing loom has to be set up, allowing the ink layers to filter (one colour at a time) from the loom to the surface.

- Economical for average and large quantities
- High quality for logos and graphics

HEIGHT
h.80cm - Standard
h.100cm - Oversize



Serigraphic - printing with screen.

MESH BANNERS

Practical, effective and economic windbreakers made of polyester, ideal to be used during events. They can be supplied in rolls or in single units, with or without PVC reinforced fixing eyelets.

INFLATABLES | ARCH

elleerre® Dove c'è passione

ElleErre produces advertising inflatable to make your event exclusive. The inflatables can be customized in shape, colour and size.
They are printed on certified waterproof and fireproof polyester. It is possible to print any graphic or picture directly on the structure with no limits of colours. It is also possible to install your banner/logos through the fizing velcro stripes available on standard colour arches.
The silent electrical powered engine incorporated in the structure and continuously pumps air into the inflatables, keeping them perfectly tight.

Inflatable arch made of Class1 fireproof polyester, with aeronautic seams, together with anchoring ropes, optional Velcro to fix the banners (arch without customizing), fan and bag.

- Different shapes and sizes
- 100% customizing
- Silent engine
- Automatic and quick assemblage

- Elastic and insulating material

ARM SLEEVE

They have become a must to have in all kits for sporting athletes. A distinctive element, a way to differentiate, a technical element or fashion. From basketball players to ultratrailers, from cyclists to volleyballs: all are crazy about arm sleeve. ElleErre arm sleeves are customizable with any graphics and any color: even fluorescent.

THERMAL

EASY

EASY TO USE

If it gets too hot, turn it up easily on your wrist

SPEED SOCKS

ElleErre Speed Socks: the super aerodynamic sock for maximum performance and an enviable look.

Speed Socks are produced to adhere perfectly to the ankle and calf and thanks to the absence of elastic, they promote blood circulation and minimizes friction with the air.

The upper part of the socks is made from an elastic polyester fabric. It has a grooved technical structure with vertical stripes and an internal side seam to facilitate aerodynamics. The upper portion adheres perfectly to the calf thanks to a silicone band which guarantees perfect stability of the sock even during longer rides.

The extremely technical lower part is composed of Carbon Resistex, a continuous filament of conductive material based on active carbon and textile fibers. This material improves the dispersion of moisture by favoring the evaporation of sweat. With less moisture in contact with the skin there is a greater sensation of well-being and comfort.

Further, carbon has been shown to improve the electrical performance of the human body by promoting regular blood circulation.

Suitable for temperatures ranging from 10° to 40°C.

COMPOSITION
Top portion:
• Polyester, Elastane
Bottom portion:
• 55% X-Dry (PP) • 35% X-Pro (PA) • 6% Carbon Resistex • 4% Lycra
