FLYING BANNERS

◆ **Easy-Flag**

- ◆ CLASSIC
- ◆ DROP
- ◆ MINI
- ◆ TABLE
- ◆ BASE PLATES AND ACCESSORIES

◆ MARKING FLAG

◆ SUPPORTER FLAG

Available in four sizes in the classic "knife" shape, they can be mounted and dismantled very quickly. The flag kit, enclosed in a strong polyester bag with zip, includes the screw ideal to fix the flag in soft ground such as grass, snow, sand and soil. Various metal bases are available, studied for different uses and fit for solid surfaces as concrete and asphalt. You can also order just the flag.

- Large and small quantities
- Anodized aluminium structure
- Spring steel flexible tip

- Quick and easy to assemble
- Packaging designed for easy storage
- Customized flag

The Easy-Flag Drop is a flag with the same features of the classic one but with a "drop shaped" flag, 100% made of polyester. Its complete kit is delivered in a strong polyester bag with a zip including the screw to fix it on soft grounds, advertising flag, anodized aluminium poles and flexible spring steel tip. Thanks to its structure it stays perfectly tight even with no wind. You can also order just the flag.

- Easy and quick to assemble
- Customized flag

SPEAKING
BOX

Easy-Flag Table is the table flag which gives visibility to your brand in an elegant and unusual way. Ideal for shops and fairs. Fully customizable and without colours limits. Flag made of polyester. Available in a one-box complete kit with polished metal base, fiberglass pole.

Easy-Flag Table Full Kit

Easy-Flag Table full kit includes

Marking flags are an indispensable tool for every outdoor event. Delimiting several areas of the race and marking the path is paramount for the safety. For this reason ElleErre has designed and realized this versatile marking flagship, easy to position and fully customizable.

- Standard size 25 x 33 cm
- Wood pole

HIGH-VISIBILITY FLAGS

The high-visibility marking flags are essential for night events and competitions. Marking the route when it is dark is a matter of safety. For this reason ElleErre has realized this versatile, fully customizable, easy-to-install flag, with an high-visibility section.

- Digital printing
- High-visibility section

- Nautical polyester fabric
- Beech wood striped

- Standard size 25 x 33 cm
- Customizable dimensions

CAR FLAG

ElleErre car flags are designed to be fitted directly out of the window, drawing the attention and curiosity of those who see them. Car flags are the best way to promote your brand during car track events.

Plastic car holder

SUPPORTERS' FLAG

The supporters' flags during sport events are an exceptional tool for visibility. Flags for fans and supporters are designed to root for relatives and friends. Swinging at the passage of athletes or on arrival is always fun for adults and children. Made with European flag-making high grade nautical polyester, a 100% recyclable material, which ensures excellent printing quality and durability over time.

- Digital printing
- Nautical polyester fabric
- Wooden pole

Easy-Gazebo

◆ Easy-Gazebo LIGHT

◆ Easy-Gazebo PRO

Easy-Gazebo PRO has an aluminium structure, while the roof and sidewalls are digital printed and fully customizable. The Class 1-certified fabric is waterproof and fireproof, making all ElleErre gazebos suitable also for indoor use.

The roof, the pelmets and the sidewalls are available in a range of neutral colours, without customization (Mod. STANDARD), while the version Roof Easy-Gazebo can be fully customized with no limits for colours or graphics. It is also possible to print high definition pictures on the sidewalls and the roof, with no additional costs.

In the measures 3x3 m e 3x4,5 m, the frame Easy-Gazebo Light is also available with hexagonal aluminium structure poles, which are lighter and cheaper. Both the PRO and LIGHT structures can be folded and opened in a few seconds, allowing a quick installation.

These gazebos are delivered with rods, anchoring pegs and wheeled carry-on case for an easy transport. Spare parts and accessories are available, such as extra metal ballasts, sidewalls with doors and windows which can be produced upon customer request.

BANNERS

- ◆ TNT DIGITAL PRINTING
- ◆ TNT SERIGRAPHIC PRINTING
- ◆ MESH BANNERS

Practical, efficient and economical, the TNT nonstop unit banners are ideal to be employed at sporting events and on any other occasion. They can be delivered in rolls or in single units with or without PVC reinforced installation rings. The digital printing is employed for small quantities and complex graphics, while for big quantities we prefer the serigraphy, achieving the best value for money.

- Digital or serigraphic printing
- endless possibilities of use outdoors and indoors
- Lightweight
- cost transportation

- Finishing possibilities:
 - roll
 - roll with rings
 - single banners with rings

- Easy to hook the banners to the structures (poles, gates, barriers...)
- Available in the standard size (height 80 o 100 cm) or customizable size (up to 160 cm and beyond) according to the customer's needs
- The quality of printing allows to print both simple logos and high definition photographs

Accessories

RINGS WITHOUT REINFORCEMENT

RINGS WITH REINFORCEMENT

MULTI-COLORED BAND

TNT BANNERS/DIGITAL PRINTING

Digital printing is to be used for graphics with a wide range of colours and shades and it should be preferred for smaller quantities. The result is a high definition printing with bright colours, uniform shades and sharp details.

- Best quality for complex pictures and drawings
- Possibility to duplicate any graphics with no colour limit
- Suitable for the production of small quantities
- Printing without loom

HEIGHT

- h.80cm - Standard
- h.100cm - Oversize

TNT BANNERS/ SERIGRAPHIC PRINTING

The serigraphic printing is to be preferred for larger quantities, it is suitable for printing plain colour graphics, with clearly defined outlines and colours.

To obtain a serigraphic print a printing loom has to be set up, allowing the ink layers to filter (one colour at a time) from the loom to the surface.

- Economical for average and large quantities
- High quality for logos and graphics

HEIGHT

- h.80cm - Standard
- h.100cm - Oversize

Light and breathable technical shirt. Made of super-soft 100% hypoallergenic polyester fabric. Ideal for all sports, even for Ultra Trail races, and at the same time a designer t-shirt.

MADE IN ELLEERRE for the entire production process from drawing to printing, from packaging to labeling.

The shirts can be enriched and accompanied by a personalized card that tells the story of the shirt, the artist or the project to which it is linked.

- Customizable with any type of graphics or color
- Also with Fluo colors
- Light and breathable
- Hypoallergenic fabric

Thanks to ElleErre bike cover you can protect your bike when carrying and bring it home or in office without dirtying. ElleErre bike cover is made by elasticized polyester fabric, totally customized thanks to the digital printing, without limits color.

It has a practical pocket inside which makes it easily foldable, comfortable to carry without taking up space.

- One size: 163x65 cm
- Machine-washable
- Protect wheels and transmission
- Elastic Polyester

Headband are an important element for those who do sports, hold hair, sweat and dignity. For this reason the Headband are stealing and are a gadget field in all races. Organizers can personalize it with the logo of the event, sponsors, with the graphics they prefer. The headband we produce is elasticized in polyester fabric, comfortable and suitable for staying stable even during movement and physical activity.

From this year ElleErre has the possibility to make it even in fluo colors.

- Customized
- Customized with Fluo colors
- Size: 10x48cm
- Elastic material

The ElleErre thermal head band was developed for performing running, cycling or other activities after the temperature has gotten colder. It is highly insulating thanks its ultra-soft microfiber layer making this an essential accessory for your fall and winter outdoor activities.

The thermal headband by ElleErre has a plush and inviting interior that is soft to the touch promoting maximum comfort against your skin.

The fabric is highly elastic, breathable, has an elevated resistance to pilling and is machine washable.

- Customized
- Customized with Fluo colors
- Size: 10x23cm
- Elastic and insulating material

They have become a must to have in all kits for sporting athletes. A distinctive element, a way to differentiate, a technical element or fashion. From basketball players to ultratrailers, from cyclists to volleyballs: all are crazy about arm sleeve. ElleErre arm sleeves are customizable with any graphics and any color: even fluorescent.

THERMAL

Hot component that protects from the cold.

EASY TO USE

If it gets too hot, turn it up easily on your wrist

ElleErre Speed Socks: the super aerodynamic sock for maximum performance and an enviable look.

Speed Socks are produced to adhere perfectly to the ankle and calf and thanks to the absence of elastic, they promote blood circulation and minimizes friction with the air.

The upper part of the socks is made from an elastic polyester fabric. It has a grooved technical structure with vertical stripes and an internal side seam to facilitate aerodynamics. The upper portion adheres perfectly to the calf thanks to a silicone band which guarantees perfect stability of the sock even during longer rides.

The extremely technical lower part is composed of Carbon Resistex, a continuous filament of conductive material based on active carbon and textile fibers. This material improves the dispersion of moisture by favoring the evaporation of sweat. With less moisture in contact with the skin there is a greater sensation of well-being and comfort.

Further, carbon has been shown to improve the electrical performance of the human body by promoting regular blood circulation.

Suitable for temperatures ranging from 10° to 40°C.

COMPOSITION
Top portion:
• Polyester, Elastane
Bottom portion:
• 55% X-Dry (PP)
• 35% X-Pro (PA)
• 6% Carbon Resistex
• 4% Lycra

- Ideal for time trial, track or road cycling
- Brilliant colors thanks to the highest quality digital printing
- Perfect fit
- Elegant look
- Adherence to the leg without creases
- Minimal stitching on the inside of the leg
- STANDARD 100 certified fabric by OEKO-TEX®

Light Cap is the perfect cap for all outdoor sports: cycling, running, trail running, etc...
