FLYING BANNERS

- ◆ **Easy-Flag**
 - ◆ CLASSIC
 - ◆ DROP
 - ◆ MINI
 - ◆ TABLE
 - ◆ BASE PLATES AND ACCESSORIES
- ◆ MARKING FLAG
- ◆ SUPPORTER FLAG

Available in four sizes in the classic "knife" shape, they can be put up and dismantled very quickly. The flag kit, enclosed in a strong polyester bag with zip, includes the screw ideal to fix the flag in soft ground such as grass, snow, sand and soil. Various metal bases are available, studied for different uses and fit for solid surfaces as concrete and asphalt. You can also order just the flag.

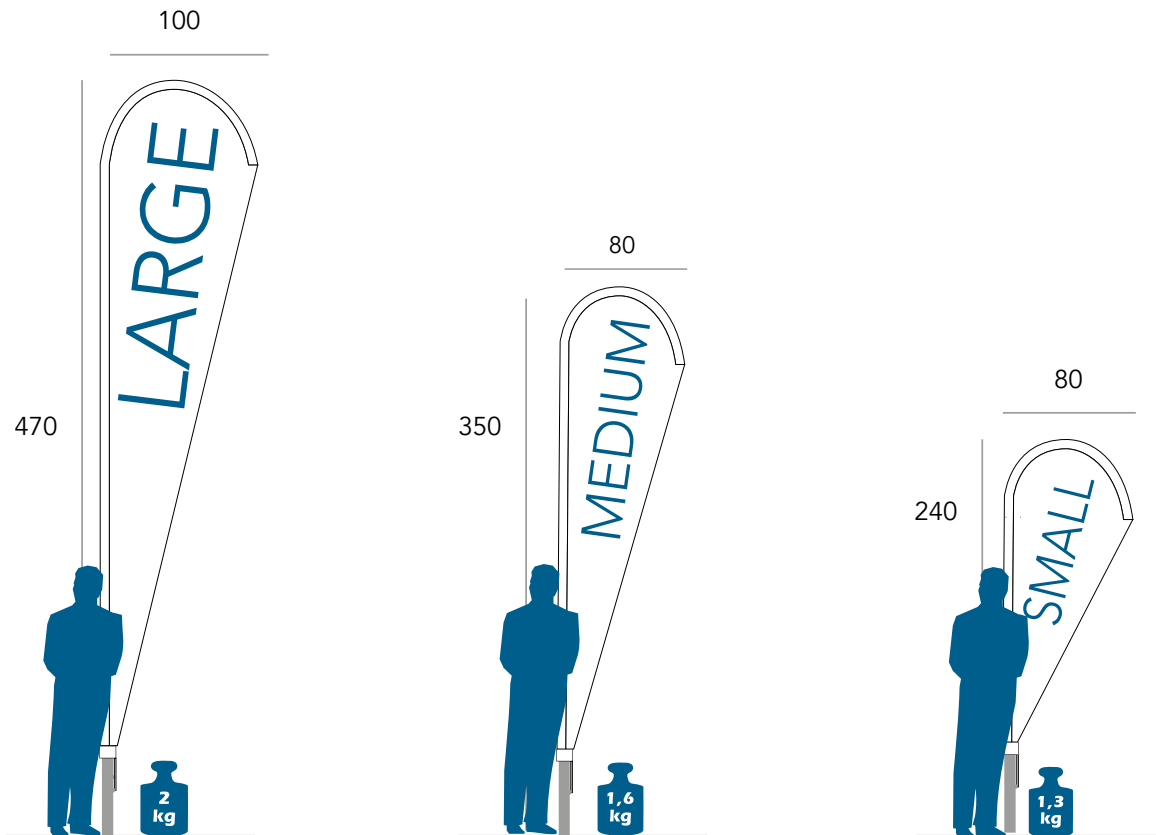

- Large and small quantities
- Aluminium anodized structure
- Spring steel flexible tip

- Quick and easy to assemble
- Packaging designed for easy storage
- Customized flag

The Easy-Flag Drop is a flag with the same features of the classic one but with a "drop shaped" flag, 100% made of polyester. Its complete kit is delivered in a strong polyester bag with a zip including the screw to fix it on soft grounds, advertising flag, anodized aluminium poles and flexible spring steel tip. Thanks to its structure it stays perfectly tight even with no wind. You can also order just the flag.

- Easy and quick to assemble
- Customized flag

Flag made of polyester. Available in a complete kit with polished metal base, fiberglass pole in a single box.

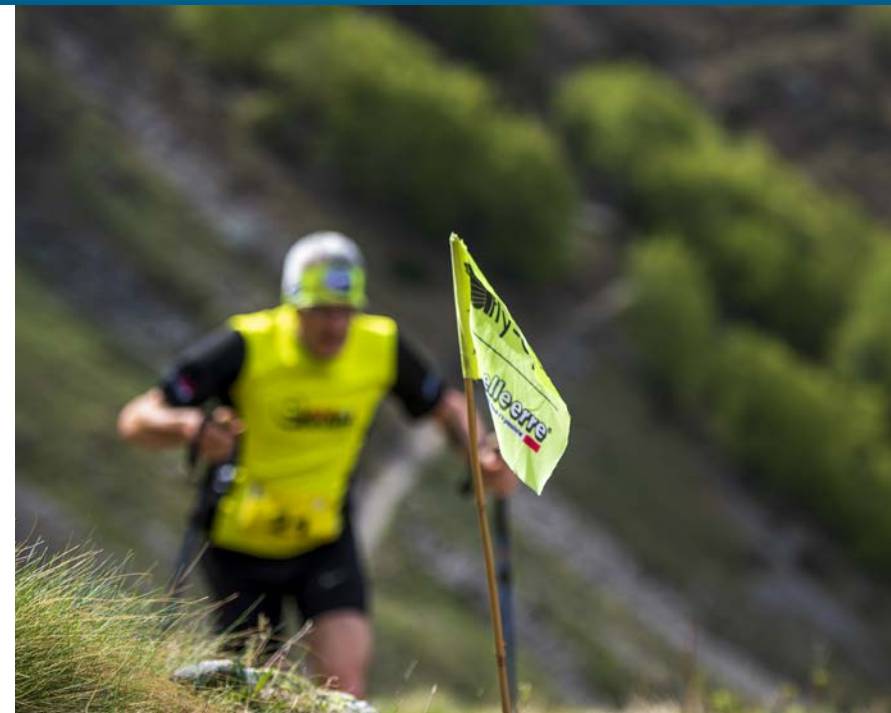

Easy-Flag Table Full Kit

Easy-Flag Table full kit includes

Marking flags are an indispensable tool for every outdoor event. Delimiting several areas of the race and pointing to the path is important for the security. For this reason ElleErre has designed and built this versatile marking flagship, easy to position and customizable at 100%.

- Standard size 25 x 33 cm
- Wood pole

REFLECTIVE FLAGS

The marking reflective flags are an indispensable tool for night events and competitions. Marking the route when it is dark is a matter of security. For this reason, ElleErre has designed and built this versatile 100% flagship, easy-to-locate and customizable flag, which has an high visibility tape.

- Digital printing
- A reflective tape

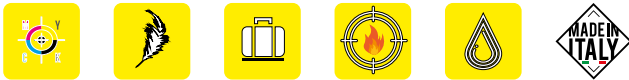

- Nautical polyester fabric
- Beech wood striped

- Standard size 25 x 33 cm
- Ability to customize the measurements

CAR FLAG

ElleErre car flags are designed to be fitted directly out of the window, getting attention and interest of those who see them. Car flags are the best way to promote your brand during events with cars on the track.

Plastic car holder

HANDWAVING FLAGS

The handwaving flags during sport events are a great tool for visibility. Flags for fans and supporters are designed to cheer relatives and friends. Swinging at the passage of athletes or on arrival is a pleasure for adults and children. They are made with nautical polyester, European flag-making high-grade material; in addition to being a 100% recyclable material, it's unique as a print-out and time-efficient.

- Digital printing
- Nautical polyester fabric
- Wooden pole

Easy-Gazebo

◆ Easy-Gazebo LIGHT

◆ Easy-Gazebo PRO

Easy-Gazebo PRO is the structural aluminium, possibility of customizing roof and sidewalls through digital printing. Thanks to the polyester waterproof and fireproof fabric, which has been certified as Class 1, all the ElleErre gazebos can be used also indoors.

The roof, the pelmets and the walls are available in a series of neutral colours without customization (Mod. STANDARD) and in the version Roof Easy-Gazebo that can be completely customized with no limits as for colours or graphics. It's also possible to print the fabrics of the walls and the roof with high definition pictures, always at the same price.

As for the measures 3x3m e 3x4,5m, the frame Easy-Gazebo Light is also available with hexagonal aluminium tubes, lighter and cheaper. Both the structures PRO and LIGHT, can be folded and you can open them in very few seconds, allowing a quick positioning.

They are delivered with ties, anchoring pegs and carry case on wheels for an easy transport. A series of spare parts and accessories are also available such as extra metal ballasts, walls with doors and windows which can be produced on customer request.

BANNERS

- ◆ TNT DIGITAL PRINTING
- ◆ TNT SERIGRAPHIC PRINTING
- ◆ TRAFORATO BANNERS

Practical, efficient and economical, the TNT nonstop unit banners are ideal to be employed at sporting events and on any other occasions. They can be delivered in rolls or in single units with or without rings with PVC reinforcement. We can print it either with digital technique for small quantities and for complex graphics or serigraphy for big quantities, with an excellent value for money.

ROLL

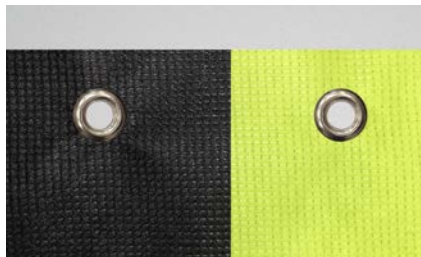

- The printing of the TNT banners can be digital or serigraphic
- Endless possibilities of employ outdoors and indoors
- Lightweight
- Low cost transport

- Finishing possibilities:
 - roll
 - roll with rings
 - single units with rings

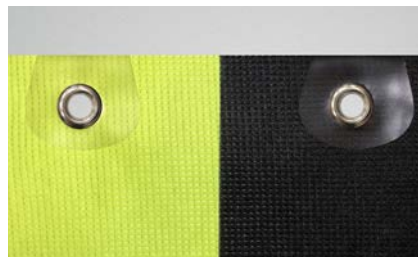

- Easy to hook the banners to the structures (poles, gates, barriers...)
- Possibility of exploiting the standard size (height 80 o 100 cm) or of customizing (until 160 cm and beyond) according to the different needs
- The quality of printing allows to print both simple logos and high definition photographs

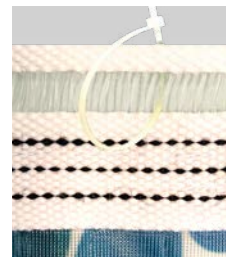

Accessory

RINGS WITHOUT REINFORCEMENT

RINGS WITH REINFORCEMENT

MULTI-COLORED BAND

TNT BANNERS/DIGITAL PRINTING

The digital printing is used when the drawing is multi-coloured and with shades: it's particularly suitable for pictures and the complex coloured graphics and it's to be preferred for small quantities. The result is a high definition printing with bright colours, uniform shades and with clear details.

- Best quality for complex pictures and drawings
- Possibility to duplicate any graphics with no limits as for colours
- Suitable for the production of small quantities
- Printing without loom

HEIGHT

- h.80cm - Standard
- h.100cm - Oversize

TNT BANNERS/ SERIGRAPHIC PRINTING

The digital printing is the technique we use for large orders, suitable for the printing of plain colour graphics, with clear outlines and distinct colours. To produce a serigraphic print you have to create a printing loom which allows the ink layers to filter (one colour at a time) from the loom to the surface.

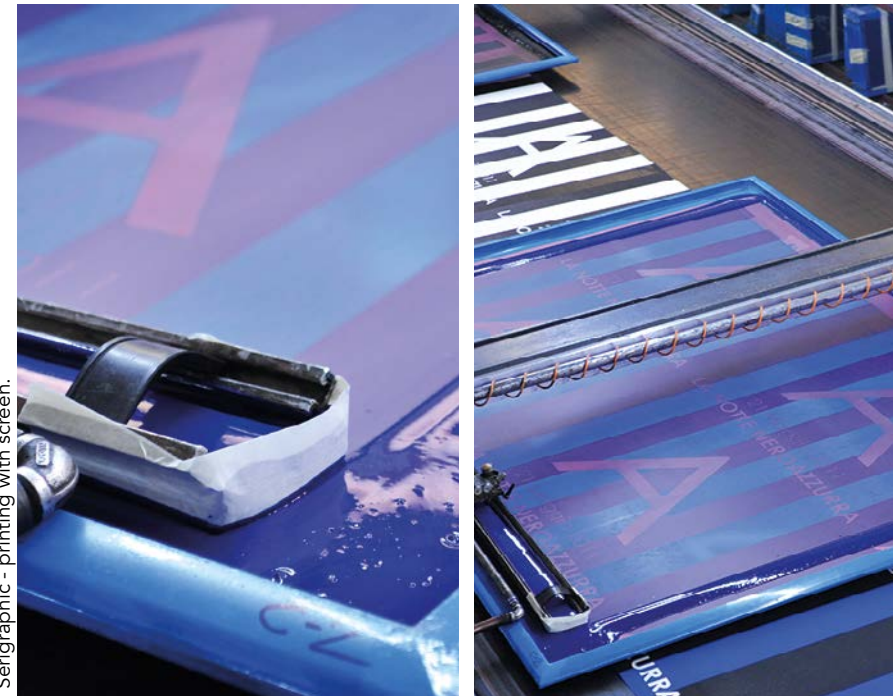

- Economical for average and large quantities
- High quality for logos and graphics

HEIGHT

- h.80cm - Standard
- h.100cm - Oversize

Digital printing.

Serigraphic - printing with screen.

- Elastic polyester

Headband are an important element for those who do sports, hold hair, sweat and dignity. For this reason the Headband are stealing and are a gadget field in all races. Organizers can personalize it with the logo of the event, sponsors, with the graphics they prefer. The headband we produce is elasticized in polyester fabric, comfortable and suitable for staying stable even during movement and physical activity.

From this year ElleErre has the possibility to make it even in fluo colors.

- Customized
- Customized with Fluo colors
- Size: 10x48cm
- Elastic material

The ElleErre thermal head band was developed for performing running, cycling or other activities after the temperature has gotten colder. It is highly insulating thanks its ultra-soft microfiber layer making this an essential accessory for your fall and winter outdoor activities.

The thermal headband by ElleErre has a plush and inviting interior that is soft to the touch promoting maximum comfort against your skin.

The fabric is highly elastic, breathable, has an elevated resistance to pilling and is machine washable.

- Customized
- Customized with Fluo colors
- Size: 10x23cm
- Elastic and insulating material

They have become a must to have in all kits for sporting athletes. A distinctive element, a way to differentiate, a technical element or fashion. From basketball players to ultratrailers, from cyclists to volleyballs: all are crazy about arm sleeve. ElleErre arm sleeves are customizable with any graphics and any color: even fluorescent.

THERMAL
Hot component that protects from the cold.

EASY **EASY TO USE**
If it gets too hot, turn it up easily on your wrist

ElleErre Speed Socks: the super aerodynamic sock for maximum performance and an enviable look.

Speed Socks are produced to adhere perfectly to the ankle and calf and thanks to the absence of elastic, they promote blood circulation and minimizes friction with the air.

The upper part of the socks is made from an elastic polyester fabric. It has a grooved technical structure with vertical stripes and an internal side seam to facilitate aerodynamics. The upper portion adheres perfectly to the calf thanks to a silicone band which guarantees perfect stability of the sock even during longer rides.

The extremely technical lower part is composed of Carbon Resistex, a continuous filament of conductive material based on active carbon and textile fibers. This material improves the dispersion of moisture by favoring the evaporation of sweat. With less moisture in contact with the skin there is a greater sensation of well-being and comfort.

Further, carbon has been shown to improve the electrical performance of the human body by promoting regular blood circulation.

Suitable for temperatures ranging from 10° to 40°C.

COMPOSITION
Top portion:
<ul style="list-style-type: none"> • Polyester, Elastane
Bottom portion:
<ul style="list-style-type: none"> • 55% X-Dry (PP) • 35% X-Pro (PA) • 6% Carbon Resistex • 4% Lycra
