Our snowbanners are made of nautical polyester, fully customizable and digitally printed fabric. The kit includes the internal flexible fiberglass tension pole 4 eyelets and fixing pegs. Ideal for snowparks, easy and quick to assemble and remove.

Size

Diameter 75 cm
Diameter 150 cm

The customized windsock is nautical polyester cone, digitally printed and resistant to air flow and harsh weather. Blowing inside the sock, the wind changes its position, conveying information about its direction and intensity. At the same time, thanks to customizable fabric, the windsock provides an advertising message with great effect. The customized windsocks are delivered with anodized aluminium poles, rotating hook, carry case and ground fixer.

Windsock Full Kit

- . Carry case
- . XL Fixer
- . Aluminium poles
