The lycra backdrop is a high-impact scenic solution, ideal for events, photo shoots, conferences, and promotional activities.

It consists of a lightweight, intuitive-to-assemble tubular aluminum frame, complete with stabilizing feet at the base. The covering is made of stretch lycra fabric, double-sided printed and fully customizable (with different graphics on each side).

The elasticity of the lycra ensures a surface that is always taut and free of creases, with a clean and professional visual effect.

- 300x223 cm (base, height)
- Double-sided
- High definition printing
- Ideal for outdoors and indoors
