Backstroke flags are an essential feature for all swimming pools hosting competitions, events, or lane swimming activities.

The flags feature high-quality custom printing and are sewn onto durable webbing to ensure stability and easy installation across the pool.

Available in various lengths and sizes, they adapt perfectly to different requirements. The customization option allows the inclusion of logos, corporate colors, and dedicated graphic elements.

The flags are printed on special 240-micron paper, selected for its high resistance to water and chlorine exposure. The material delivers vibrant colors and long-term durability.

- Chlorine and water resistant
- Custom Printing
- Available in various lengths and dimensions
