A string of pennants is an effective and colorful promotional solution, ideal for decorating and enhancing a wide range of events and occasions, such as festivals, openings, promotional campaigns, and commercial initiatives. Available in both rectangular and triangular formats, they are made from 100% nautical polyester fabric, designed to ensure high resistance and long-lasting durability even in outdoor environments. The flags are sewn onto webbing or rope to allow quick and easy installation on the desired structures, ensuring maximum visibility. Thanks to high-resolution digital printing, the pennant flags can be fully customized with logos and graphics without color limitations.
